Main Goal

If reelected my main goal will be just as it has been since my initial election in 2011. To continue to do my best to ensure better service and reliability to H.E.A. members, while keeping consumer rates as low as possible.

One way to help do that is to seek better ways to do things, to look for ways to reduce costs without sacrificing quality.

We presently drive some of our energy from hydro-power, but, as renewable energy technology continues to improve, other proven resources – geothermal, wind, solar, and even tidal energy should all be given serious considerations.

H.E.A. must take a lead in investigating, and with the support of the membership, invest in and implementing of renewable sources whenever practical.

With an innovative and positive approach, not only can long-term savings for our members can be achieved, but even more importantly, we can achieve a more stable energy future for all of us.
